Maya Rochat, **LANGUAGE OF COLOR**

The work « Language of color » plays with water's and painting's fluidity. Maya Rochat observes the language of organic life, exploring matter and time.

In these 14 pictorial worlds, she uses natural and artificial elements, interbinding both creative and destructive processes. The structures and compositions speak of our inner world ; they reflect its density, its beauty, and its perpetual movements. each image becomes another possible reading of the world.

« Like the mountain, you don't move by reactions, but you process and transform within you »
